**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-47 are rejected under 35 U.S.C. 102(e) as being anticipated by Helfer et al. (US 7010357). Helfer et al. disclose a probe for generating an electromagnetic field, comprising: a first conductor for receiving a first current signal; a second conductor for receiving a second current signal; a first radiation coil coupled to the first conductor for radiating a first electromagnetic field based on the first current signal; and a second radiation coil coupled to the second conductor for radiating a second electromagnetic field based on the second current signal, the first and second electromagnetic fields causing an interferential electromagnetic field pattern.
